preparation and revision guides

Pharmacy Foundation Assessment Questions 2 is the second book in the new series, a successor to the popular Pharmacy Registration Assessment Questions series.

The new book features over 400 revision questions. Along with guidance about how to prepare for, and approach taking the new GPhC Registration Assessment exams. The books in both series can be used in conjunction or alone to form an impressive question bank to help in your exam preparation.

The questions and guidance are fully aligned to the latest guidance regarding the assessment process from the GPhC. Questions are based on latest editions of both the British National Formulary and BNF for Children, alongside the most current treatment guidelines available at the time of writing.

This book also includes questions featuring prescriptions, patient information and pictures of conditions, replicating the type of questions students may encounter in the real exam.

This revision aid gives students the opportunity to practice a variety of questions on styles ahead of the assessment including:

- single best answer questions
- extended matching questions
- calculations

Written by a team of experienced authors who all work with foundation trainee pharmacists every day this series has proved invaluable to students preparing for their exams.

Sonia Kauser is a Primary Care Pharmacist and Lecturer in Pharmacy Practice at the University of Manchester.
